NEW WAY TO LIVE  
NEW PERSPECTIVE TOWARDS LIFE

楽 RAKU = Comfort & Ease  
匠 SHO = A Master Craftsman

The name "RAKUSHO" reflects the simple realization of a master craftsman's work, and the quest for a user's

The RAKUSHO Z Series is Paramount Bed's latest home care bed that caters to the needs of the elderly. RAKUSHO Z incorporates more than 20 years of technological know-how and ideas that have grown and evolved from the same

## FUNCTION

## AN ALL-NEW MOTION FOR SITTING UP IN BED

Paramount Bed's revolutionary Relax Motion is a back raise mechanism which promotes a neutral pelvic position by utilising an optional combination of back raise, knee raise and tilting movements. Relax Motion also reduces body slippage during back raise by 60%, compared to KIND motion. This innovative and gentle motion for sitting up in bed offers an all-new level of comfort for users.

## COMFORT & SAFETY

### Promoting Activities

It is easier for the user to move the upper body as the pelvis is in a neutral position. This helps to promote more user activities on the bed.

### Wide Field of Vision

When in a neutral pelvic position and with the feet lowered at the same time, the user can enjoy a wider field of vision. This helps to keep the user more active.

### Effortless Bed Exit

Getting down from the bed has become more effortless as the user's feet are in a lower position. Standing up from the bed is no longer a difficult task as there is ample room around the foot

\*When a 9cm mattress is used

### Low Height at Only 21cm

The low bed height provides more safety and security for the user. Even users with small physiques can sit on the side of the bed with their heels firmly on the floor. The low height also helps to reduce the impact in the event of fall.

## ERGONOMIC DESIGN

**Reduction in Swelling**  
Swelling in the legs are reduced because the angles of the feet are adjusted in two stages during knee raise.

### Designed for Convenience

Minimalist design and height adjustment provide ample space around the foot area of the bed. This reduces workload of caregivers and makes cleaning easier.

### Handheld Controller

Whenever the bed position is changed, this will be indicated by numerals and pictorial diagrams on the LCD screen of the controller. Thus, the bed can be accurately adjusted to the desired position. The backlit screen and indicators facilitate usage even at

### Smart Storage (at Footboard)

A convenient storage space for items such as medical records or manuals.

\*Only for resin model

## ADDITIONAL ACCESSORIES

**Side-rails**  
Designed to enhance safety by preventing falls.

**Assist Bar**  
Provides support during bed exit.

**Access Port**  
Handrails for safe mobility.

**Casters**  
Additional casters make it easier to move the bed (e.g. during

**Smart Handle**  
A manual handle that keeps the bed in operation in the event of a power failure.

**Overbed Table**  
Ideal for meals and other activities (e.g. reading).
